

INSIGHT, SUPPORT & DEBOTTLENECKING

# BAROCK

Modern platform operations require profound technological insight and expertise – especially when a situation emerges that was not considered during the design stage. We provide oil and gas operators with ongoing support, insight and equipment to debottleneck their brownfield facilities. Thereby we help them overcome their operational challenges and focus on what they do best.

**BAROCK. THE INNOVATIVE USE OF  
ADVANCED SEPARATION.**

## CONCEPT SELECTION

- Conceptual process design
- Technology selection

## FEED TENDERING

- Tender support

## FEED STUDY

- Defining performance specifications
- Technology selection
- Equipment sizing
- CFD studies

**BAROCK**  
INSIGHT, SUPPORT  
& DEBOTTLENECKING

**B**

## EPC TENDERING

- Tender support

## EPC EXECUTION

- Detailed design review
- CFD studies
- Vendor bid reviews
- Final inspections

## COMMISSIONING

- Installation support  
& supervision

## START-UP

- On-site troubleshooting  
during start-up

## PRODUCTION

- Performance evaluation
- Facility debottlenecking
- Technology performance  
evaluations at site
- Vendor guarantee verifications
